INTRODUCING 2VALLEYS

2Valleys is a dependable and adaptable location landscaping and support partner. We specialise in a bespoke full-service solution to your TV and Film production needs. Our team is made up of dynamic and innovative problem solvers, here to ensure your production keeps rolling no matter how challenging the brief may be - indoor or outdoor.

We're a Yorkshire company with a nationwide presence, able to travel and work on productions around the UK. Being Yorkshire born 'n bred, we pride ourselves on offering a friendly, no-fuss service to all of our clients. Our approach has allowed us to build strong relationships with many people in the TV and Film industry, often asked back to carry out repeat business for future projects.

LOCATION LANDSCAPING SERVICES FOR TV & FILM

Our Location Landscaping services are the magic behind-the-scenes of some of the UK's biggest on-screen productions. We work with production teams to deliver the landscape they need to reflect the era and season the location needs to show.

Working to tight deadlines and location restrictions, our location landscaping team is experienced in overcoming any obstacles your production may have.

Our Location Landscaping Services include:

Set Decoration

Creating realistic sets and environments that take productions to another level. Using natural materials such as shrubs, hay bales and wooden fences, our experience team helps to source and identify the materials required.

Ground Cover

Creating new surfaces for indoor and outdoor sets, we utilise gravels, wood mulch, sands, turf, tarmac, concrete and more to suit both period dramas and modern-day sets of any size, working alongside art departments and designers to deliver the exact on-screen look required.

Landscape Construction

From constructing roads to planting trees and shrubs, we can change any landscape to suit any scenario. We've taken modern city streets back in time and transformed rural spaces into built-up areas.

Whether the changes required are temporary or permanent, our team is able to accommodate all needs and return any landscape back to its former state.

2Valleys exists to keep your production ticking smoothly. We've developed a vast collection of equipment to support you on location, including industrial lighting, water supply, heaters, waste disposal and generators. We not only supply equipment, but service it too.

Our Location Support Services include:

On-Set Location Logistics

Each production location has its own set of unique circumstances and challenges, and we're here to make access to set, and travel around it, as easy as possible with our logistics service. We offer a range of transportation vehicles to take actors and crew to where they need to be on location, no matter how challenging the terrain.

Production Support

We're adaptable, experienced and damn right handy! We really are here to support your production in any way you need, whether it's moving machinery and transportation from one location to another, supplying and topping-up diesel for on-set heaters, or filling up our water bowsers with fresh water on site. We're your trusty one-stop-shop to everything your production requires.

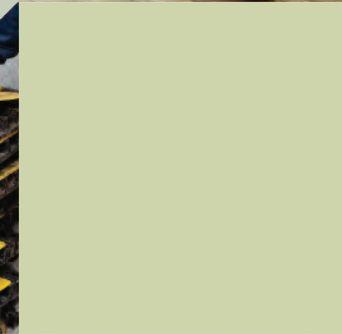

SPECIALIST EQUIPMENT HIRE

From waste and recycling to generators and lighting; 2Valleys has all of the equipment you require to get your set up and running for production! We have a vast range of specialist and serviced equipment ready to support any production.

Our equipment includes:

- Generators
- Tower Lights
- Water Bowsers
- Diesel Cubes
- Heaters
- Marquees and Ezy-Ups
- Mini Digger
- Discovery Vehicle
- Trailers
- Pick-ups
- ... and more!

BESPOKE UNIT BASE TRAILER

As a fresh pair of eyes in the industry, we saw an area in which could be improved drastically, which is the need for multiple unit trailers for different unit base requirements on set. In reaction to this, we created our own unit trailer containing a rubbish trailer divided into recycling and general waste at the back, and fresh water bowser and waste water bowser at the front, all within one unit trailer. This allows us to offer a much more eco-friendly option to productions.

“

2 Valleys have been my 'go to' team ever since I started filming in Yorkshire, on All creatures Great And Small and onto The Gallows Pole.

Nothing is ever too much trouble, the team are always brilliant and enthusiastic and most importantly, understand the filming process and how fluid and sporadic it can be.

Excellent time keepers and communicators whose equipment is always spot on. I hope to be working with 2Valleys for years to come.

”

- Ian, Assistant Location Manager and Scout

OUR ENVIRONMENTAL PROMISE

Here at 2Valleys, we're committed to helping deliver an environmentally sustainable service to all clients.

As part of this initiative, we are a proud Albert Supplier, meaning that 2Valleys is part of a recognised directory of sustainable suppliers in our media production industry.

MAKERS AND SHAKERS 2022 FINALIST

We are delighted to be a finalist in this year's Makers and Shakers Sustainability Award, with our environmental focus and pledge receiving recognition in the awards. As a growing business, we pride ourselves on shaping and evolving with the needs of the industry, this includes ways in which to make our services more environmentally-friendly.

There are various ways in which we reduce our energy usage where possible, and make sure we use sustainable energy resources:

- Our energy supplier operates a renewable-focused rates plan and ensures we are able to utilise renewable energy sources.
- We supply modern generators to ensure power can be delivered across the UK. These are reliable, efficient and can be used with HVO fuels.
- We identify the correct generator size required for each specific job in order to reduce wastage.
- We operate new and efficient equipment that meets all guidelines and regulations whilst remaining efficient.
- We deliver a low energy lighting solution, comprised of tower lights (again, modern and energy efficient). Our range also includes hybrid and battery delivery.

Waste and recycling is a significant part of our service to the TV and Film industry. Below outlines the way in which we ensure these solutions are in place and environmentally-friendly.

- When on set, we operate a strict recycling policy. This is monitored on-site with our purpose-built recycling solution, and we also employ a strict recycling scheme to recycle wherever possible whilst off-site. We make recycling easy for any production, with our portable recycling trailers.
- With the help of our waste management partners, Biffa, we ensure that zero waste ends up in landfill sites. Biffa's infrastructure can process a wide variety of waste types including paper, plastic, metal, wood, glass, soil, aggregates and textiles.
- Our food waste is serviced with the use of an aerobic digester. This process is key in reducing the volume of food waste and organic matter.

“

As a Unit Manager, I've been working with 2Valleys for a long time now, on a number of different productions.

Nothing is too much trouble for Miles, Ryan & the rest of team... from generators to matting and everything in-between.

They're a growing, no-nonsense company whose personal touch, expertise and vital knowledge of the industry exceeds most of the well know suppliers that I'd previously used. Highly recommended.

”

- Michael, Unit Manager

Our reliability, friendly approach and expert equipment has led us to work on some of the UK's biggest productions. We have developed strong and long relationships with many people in the industry, who choose 2Valleys as their trusted partner time and time again.

We've worked with:

MEET THE 2VALLEYS TEAM - MILES

Together, we meet the demands of all production needs - with passion, hardiness and a little Yorkshire charm thrown in!

Let's introduce you to some of the team.

Miles is our Co-Founder and Ground Cover Manager, peacekeeper and the brains behind 2Valleys.

Day to day, Miles is often seen on the road to oversee the running of jobs, the supervision on set, and distribution of 2Valleys' manpower. You can always count on Miles to get the job done and deliver the needs of clients - no matter how tricky the request!

Behind the scenes, Miles is making sure the team is happy and working cohesively. He's a real people person and enjoys the sociable side of the business!

MEET THE 2VALLEYS TEAM - SARA

Sara is our Co-Founder and Office Manager, always working hard behind the scenes to manage the busy 2Valleys schedule, invoicing, POs, and new enquiries.

She's always on hand to answer questions and queries from both the 2Valleys team and clients.

Although often in the office, Sara also isn't opposed to getting her hands dirty and can also be seen on the road to assist on jobs and ensure the right equipment is leaving site to get on the road for the next job.

MEET THE 2VALLEYS TEAM - RYAN

Ryan is our Location Manager and mechanical mastermind.

Ryan is usually on-site working directly with clients to carry out the job at hand, whilst managing the maintenance and running of equipment. When he's not on the job, he's often on the phone with clients to organise their needs and manage the distribution of equipment.

Ryan carries out the location recce prior to a job to identify the right equipment and services required for each production. His knowledge of the industry and equipment makes him the perfect person to identify the right solutions for client requirements.
